

Companies registry

Background

Until 2015, the Unified registry of legal entities was freely accessible, but included only a limited range of information. For instance, information on registration changes was available only through a written request which included the precise date of the change. Currently, free online search is possible only via name or registry number, while the paid online search is possible through the name of company's officer or through historical requests.

Timeline

Open Data Access to Registry of Legal Entities
