

# **AntAC prevented misappropriation of public funds on procurements**

08.06.2018

During April 2018 AntAC has achieved the termination of three contracts of public procurements, where one of the sides was a company blacklisted by the Antimonopoly Committee of Ukraine for violation of competition on public bids.

Thus, blacklisted LLC “Production Association “Kovelsilmash” had concluded agreements with SE “Lvivvugillya” and with a regional branch of PJSC “Ukrainian railway” totaling around 7 million UAH. AntAC lawyers found out that the company has been held accountable for anticompetitive actions by the decision of the Antimonopoly Committee of February 19, 2018. On that score the AntAC addressed the State Audit Service, and the contract was discharged.

Another company-violator was LLC «GC Orion», which, despite being deprived of the right to participate in procurement for three years, signed a contract with the Police Department in Luhansk region in January 2018. It turned out that the company deliberately filed a false information. However, the AntAC managed to reveal the offence and achieved termination of the contract, saving 5 million UAH to the state budget.
